SIMON MØKSTER SHIPPING

COMPANY POLICY GOVERNING QUALITY, HEALTH, ENVIRONMENT AND SAFETY (Q&SHE)

We at Simon Møkster Shipping have a very clear goal in relation to being among the very best in the field of shipping company services. Our main area of activity is the management of our own vessels and vessels owned by others, including the follow-up of new-builds and other projects.

Our aims are **zero** lost workdays, **zero** unplanned emissions, minimal burden on the environment, and the least possible material damage.

In order to achieve our goals, we must:

- Develop, implement and maintain an effective user-friendly and documented management system in accordance with the stipulations of ISO 9001, ISO 14001, the ISM and ISPS codes, and other internal and external requirements.
- Ensure an effective management structure through establishing and reviewing quality, safety, and environmental aims. Utilise relevant KPI data in order to assess development of the organisation's performance.
- Ensure that our goals and commitments are communicated and understood throughout the organisation.
- Ensure that we follow the applicable procedures and regulations within the organisation.
- Develop safe and environmentally friendly practices, and a sound work environment within the field of vessel operations.
- Ensure continuous improvement of our management systems.
- Ensure that our commitments are in accordance with all mandatory requirements, relevant codes, guidelines, and standards.
- Actively use our management system for the reporting of occurrences, and ensuring accurate corrective and preventative measures in order to avert similar incidents from occurring.
- Plan and carry out reviews and revision of the management system in order for supervision to be practiced effectively and followed up.
- Organise such that our employees thrive in a safe and secure work environment
